**So Smart. So Simple.**  
*Cinaton introduces the K2002 intelligent iSense faucet.*

**Touch-Free Intelligent Faucet**

**ABOUT CINATON**

Cinaton was founded by the iSense® Touch-free Automatic Faucet inventor, and has been pioneering the faucet industry. Their iSense® technology has calculated the precise sensitivity to ensure the functionality of all their faucets are intuitive and convenient to the user. All Cinaton faucets feature solid brass construction and comply with federal regulations including ADA and WaterSense® certifications. Cinaton's innovative inventions have received 18 patents worldwide. The brand has created a patented Solenoid valve that turns water on-off, adjusts the temperature, can provide the user the ability to offer three different temperature settings, and adjust flow rate up or down. All this without touching the faucet.

Cinaton brings technology into daily living in an unexpected place where it's greatly needed – the kitchen faucet! Imagine the convenience of a faucet that is completely hands-free, from water volume to temperature control. Introducing the K2002 Pull-out Kitchen Faucet. With five strategically placed infrared sensors and 13 functions, this stylish faucet offers a full range of touch-free operations for the ultimate in convenience and cleanliness.

The K2002 is simple to use and perfect for today's busy kitchens. With no handles or buttons, the faucet makes food prep and clean-up a breeze and helps create a more sanitary cooking environment. Control the water temperature and flow, even pause, or disable for cleaning the sink area – all without touching the faucet. Three user-defined settings are available for personalized convenience, while maximum temperature settings prevent an accidental scalding. Designed with practicality in mind it features a dual function pull-out spray head and a swivel spout while also saving users upto 70% in water savings.

With a sleek contemporary look, this faucet comes in a beautiful polished nickel or brushed nickel finish and is constructed of solid brass for exceptional durability. A PVD coating creates an easy-to-clean surface which is long-lasting and resistant to corrosion. Designed for a single-hole mount, this remarkable faucet is ADA compliant and WaterSense certified and comes with a five-year limited warranty.
